**SUMMER CAMP COVID-19 SAFETY PLAN**

**ARRIVAL**
Families will arrive and walk their camper to the check-in tent located at the entrance to Discovery Space to facilitate social distancing. On Monday family members will complete and sign check-in forms and answer screening questions. Campers will have their temperature checked daily and be ushered inside.

**Masks**
All campers, families, staff, and volunteers will wear masks during arrival, pick-up, and throughout the day except when eating and drinking.
We will provide additional masks in the event of mask loss or damage.

**Handwashing**
Campers will practice appropriate hand washing techniques when arriving, before and after lunch and snacks, and prior to pick-up.
We will provide hand sanitizer frequently and especially during shared material use.

**Social Distancing**
Campers will bring their belongings to an assigned personal cubby for storage during camp activities.
Campers will prioritize social distancing practices by maintaining a CDC recommended distance of at least 3 feet from others while in classroom spaces.

**Air Flow**
We will maintain proper ventilation in all summer camp spaces. HVAC units will be running in all inside spaces and doors will be opened to maximize air flow. When weather permits, we will utilize outside spaces during lunch and when possible during camp activities.

**Pick-Up**
Family members wearing masks will walk to the check-in tent at the entrance to Discovery Space to confirm pick-up of their camper. Campers will then be called to meet their family member to go home for the day.

**Sickness**
We encourage campers, staff, and volunteers to stay home and get tested if they are not feeling well.

We will call the families of campers experiencing symptoms during camp to have them picked up, and they will wait in a designated quarantine area away from other campers.
